

Floodline Point Sensors

The Floodline Point Sensor is a compact sensor for vertical or horizontal mounting. Water touching its stainless steel probes activates the alarm. Used with the stainless steel Floodline Guard Plate to give heavy duty physical protection and assist fixing and adjustment.

The Point Sensor is used where Detection Cable could be damaged or where some damp, minor wetting or spillage is expected or of little concern. The sensor can be connected in any number and/or combination with other Floodline sensors.

Applications:

Plant rooms
Solid floor area
Basement/tunnels

Detection:

Activates when any conductive liquid makes contact across the probes
Multiple re-use
Instant return to use after water is cleared up

Construction:

High density plastic body, stainless steel/nickel plated brass probes
Heavy duty, stainless steel Guard Plate
Encapsulation option for immersion proofing

Dimensions:

Sensor: H71mm x W44mm x D25mm
Guard Plate: H110mm x W105mm x D30mm

Fixing:

Base of wall or apparatus. Floor - free standing or fixed
Tank/Sump etc. - requires special bracket plus immersion proofing

System:

Connected in any number and/or combination with other Floodline sensors
